

Continuing **Innovation** IN INFORMATION TECHNOLOGY

NRC CSTB
2012 CRA Snowbird Conference

NRC CSTB, 1995

Clearly **linked government investments in** academic and industry **research to new IT industries** with more than \$1B in annual revenue

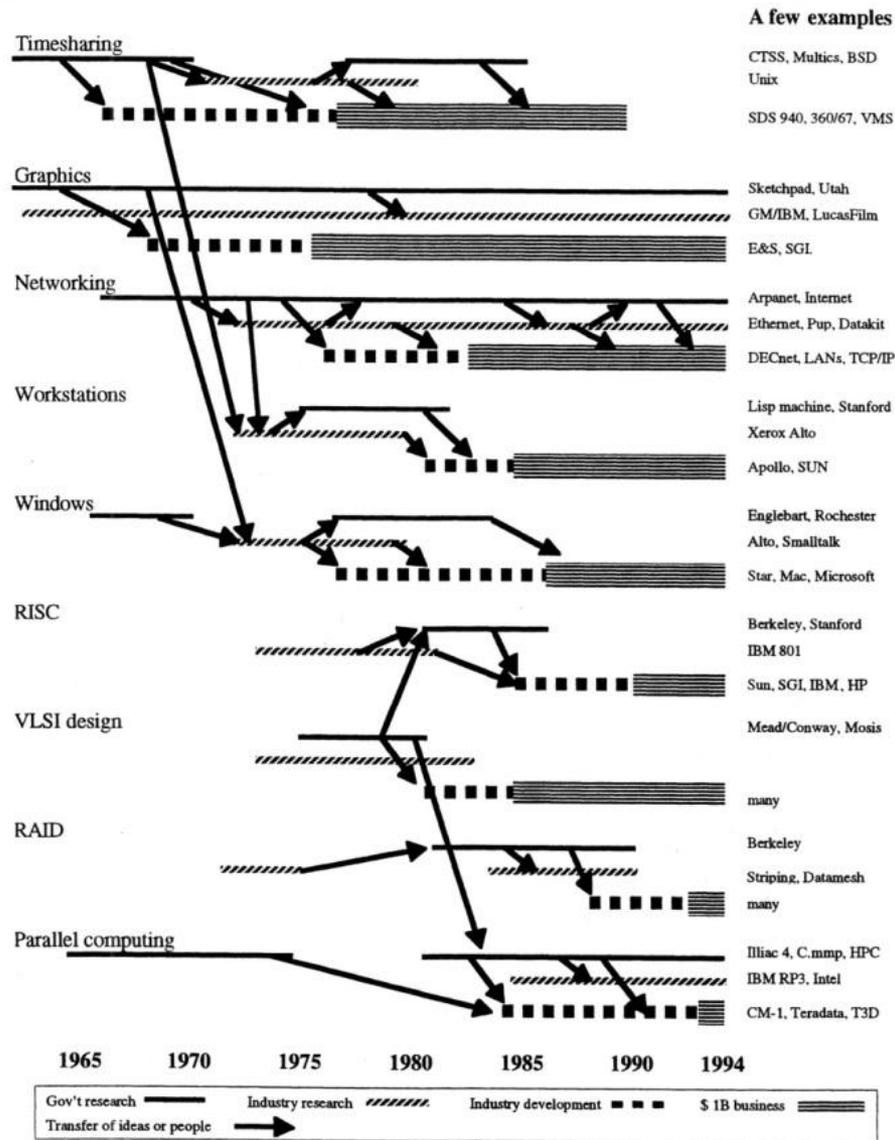

FIGURE ES.1 Government-sponsored computing research and development stimulates creation of innovative ideas and industries. Dates apply to horizontal bars, but not to arrows showing transfer of ideas and people.

Key points

The essential role of the **federal government**

The **rich interplay** between academia, industry, and gov' t

The long and **unpredictable incubation period** for research

The importance of **unanticipated results** and synergies

The economic
benefits of IT
continue to grow

ICT industries grew by 16.3% in
2010; nearly **5% of US GDP**

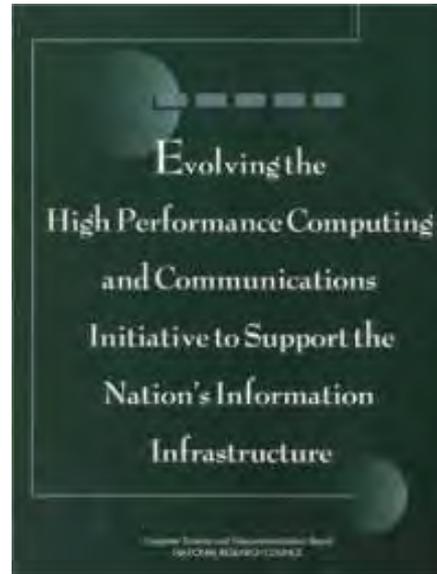

[Bureau of Economic Analysis]

Federal funding in FY2010 for
NIT R&D was **<0.03% US GDP**

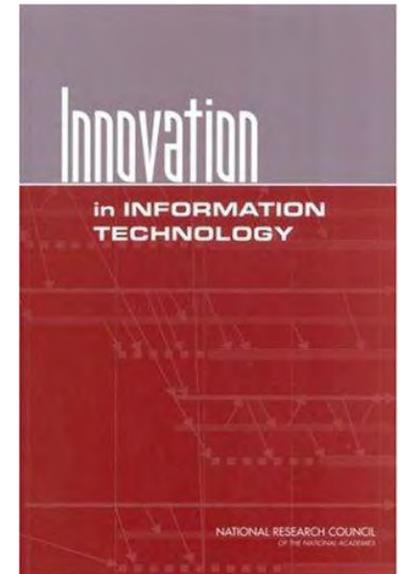

[National Research Council]

*The above reflects only the direct
benefits of IT, not the full benefits*

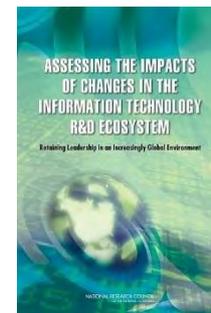

And the
“tiretracks”
continues to be an
effective tool

1995

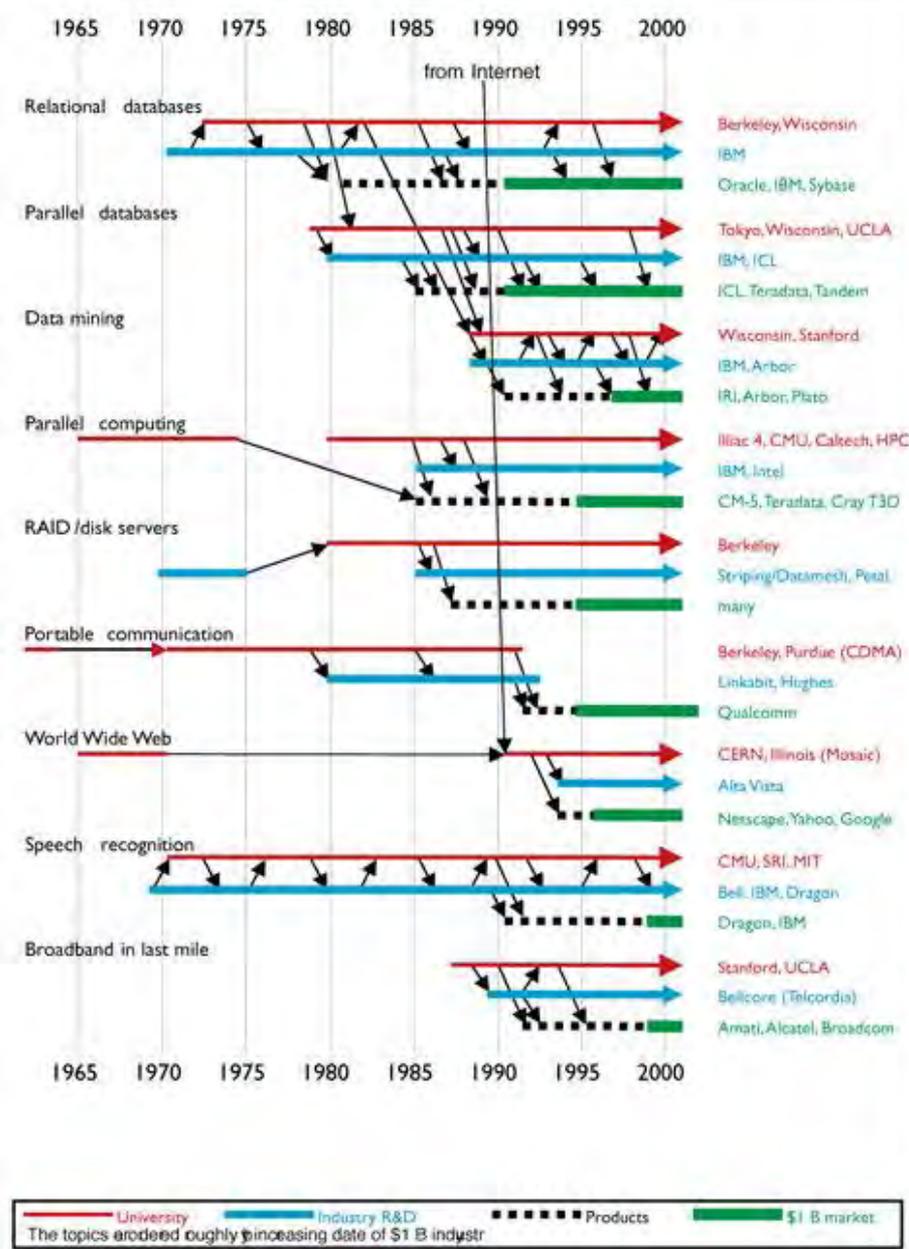

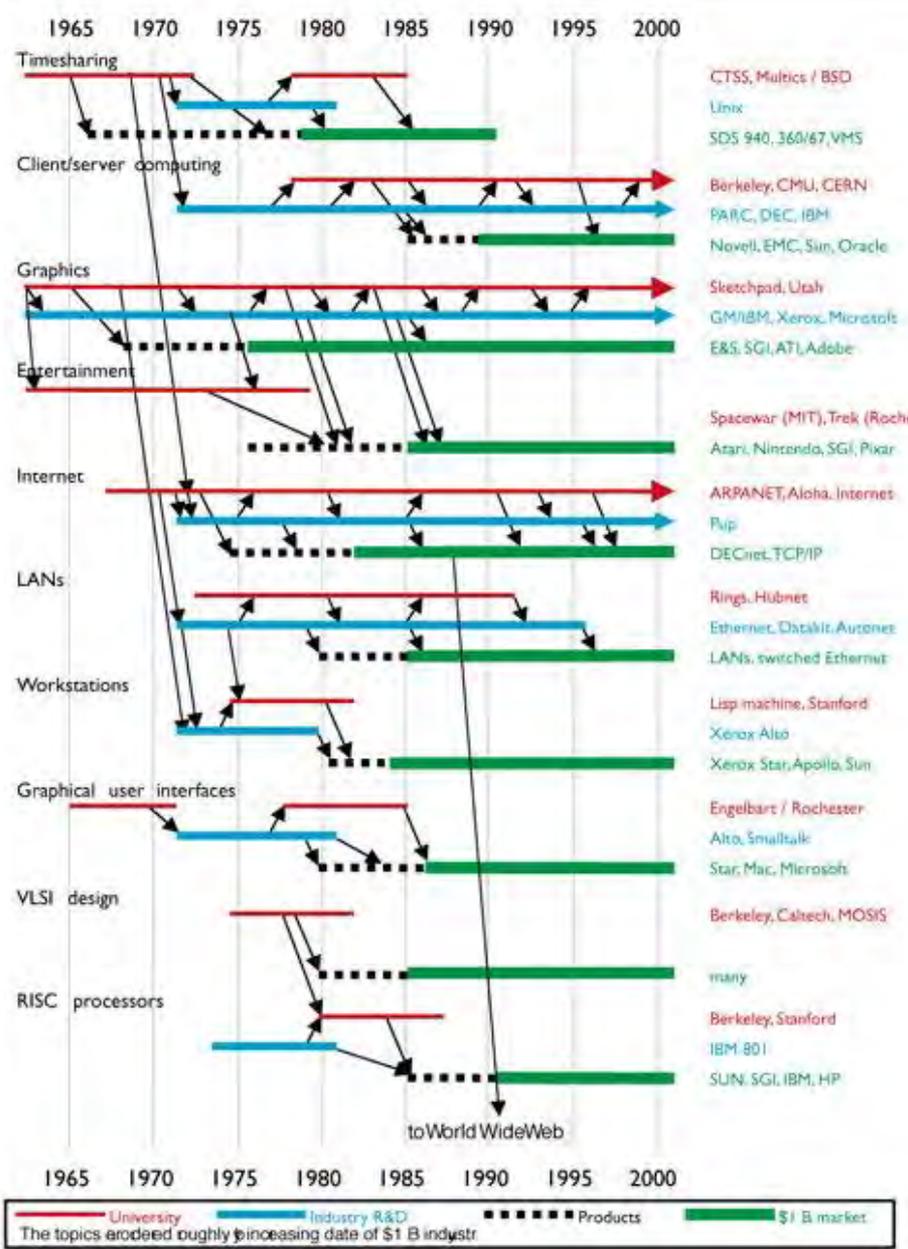

2003

2009

For 2012

“A small committee will update a previously issued figure depicting the role that government-supported academic, and industrial research plays in the formation of major new IT capabilities...”

Timesharing

Client/server computing

Graphics

Research investment areas

Entertainment

Internet

LANs

“Tire tracks” showing academic-industry interplay

CTSS, Multics / BSD

Unix

SDS 940, 360/67, VMS

Berkeley, CMU, CERN

PARC, DEC, IBM

Novell, EMC, Sun, Oracle

Sketchpad, Utah

GM/IBM, Intel, Xerox

E&S, SGI

Spacewar (MIT), Trek (Rochester)

Atari, Nintendo, SGI, Pixar

ARPANET, Aloha, Internet

Pup

DECnet, TCP/IP

Rings, Hubnet

Ethernet, Datakit, Autonet

LANs, switched Ethernet

“Billion-dollar” payoffs

Guiding principles

Emphasize **audience-appropriate payoffs**

Tell impact stories; worry less about historical completeness

Keep in mind that **less can be more**

Set the stage for **future updates** and refinements

IT Sectors With Large Economic Impact

Motorola, AMD, Intel, eBay, Akamai, Yahoo!, IBM, Electronic Arts, Adobe, Autodesk, Nuance
Qualcomm, Texas Instruments, HP, Symantec, Juniper, Facebook, Twitter, VMware, HP, Xbox, iRobot, Intuitive Surgical
iPhone, nVidia, Dell, Google, iPod

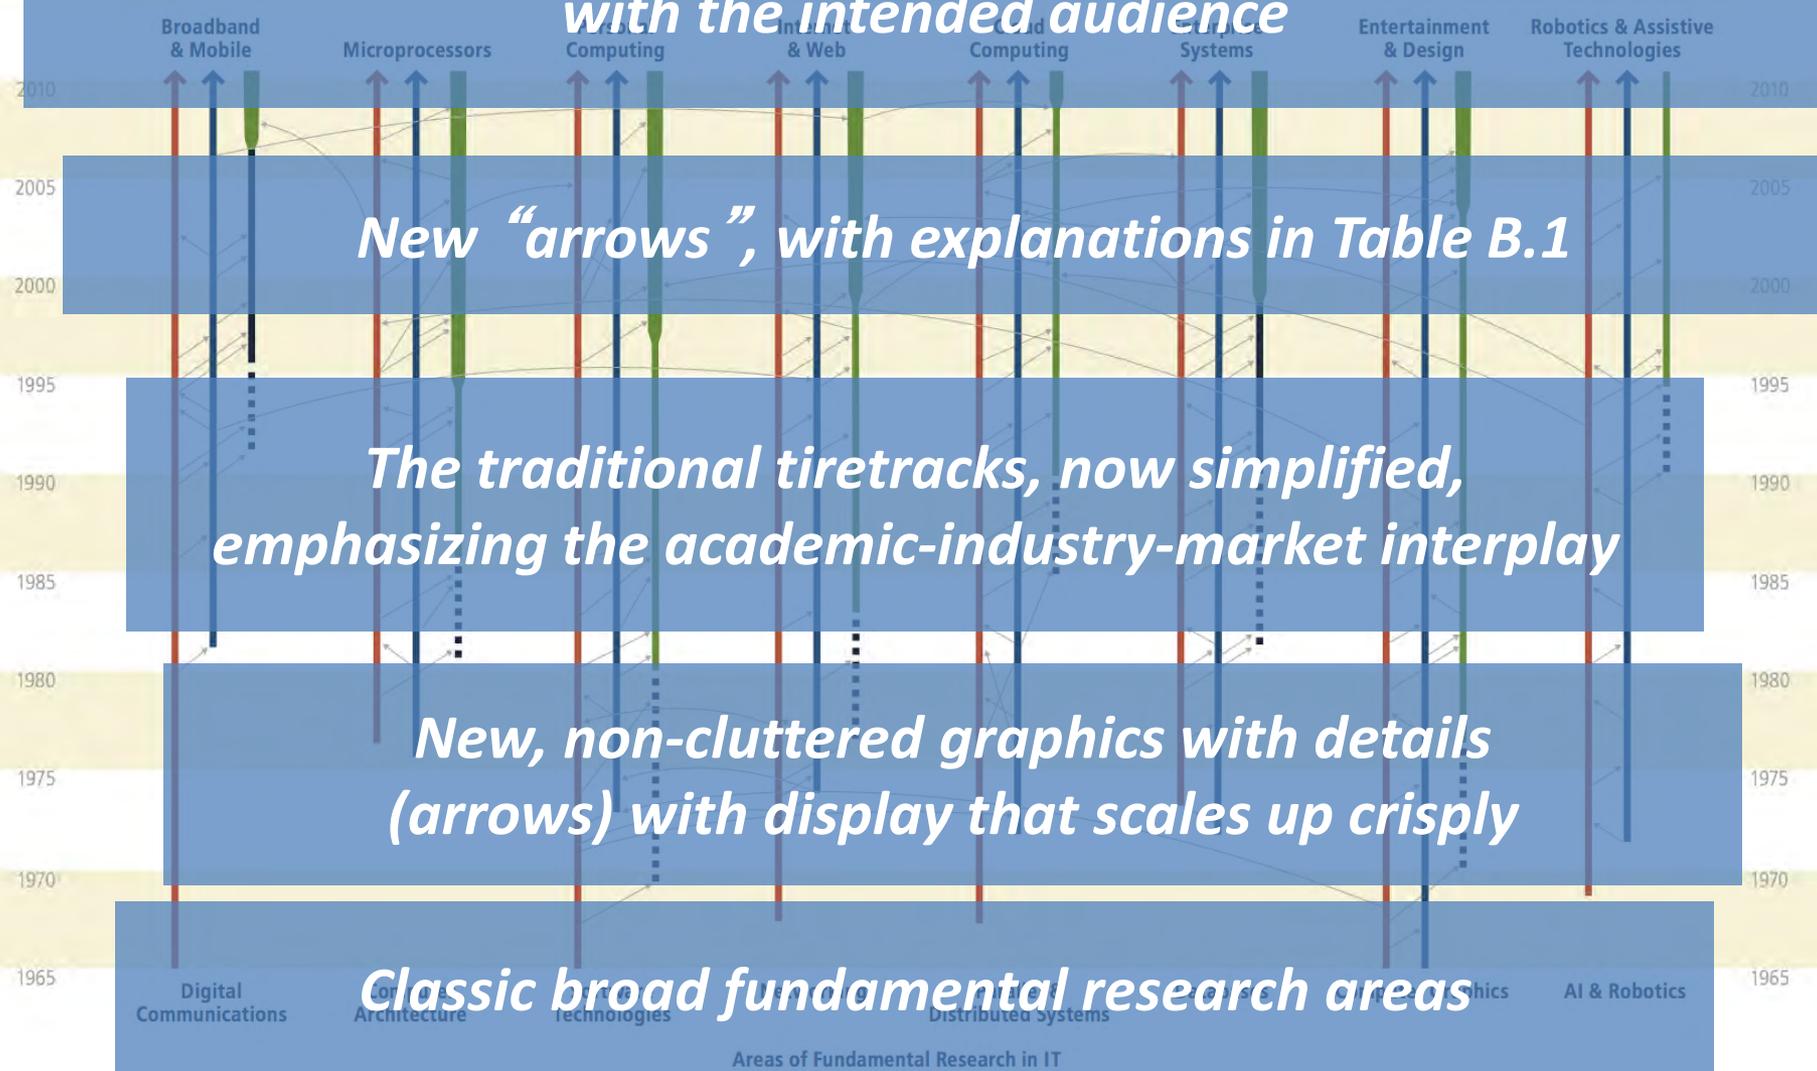

Emphasis on “punchlines” that connect with the intended audience

New “arrows”, with explanations in Table B.1

The traditional tiretracks, now simplified, emphasizing the academic-industry-market interplay

New, non-cluttered graphics with details (arrows) with display that scales up crisply

Classic broad fundamental research areas

— University — Industry R&D — Products — \$1 Billion Market — \$10 Billion Market

Panelists

David Culler, UC-Berkeley

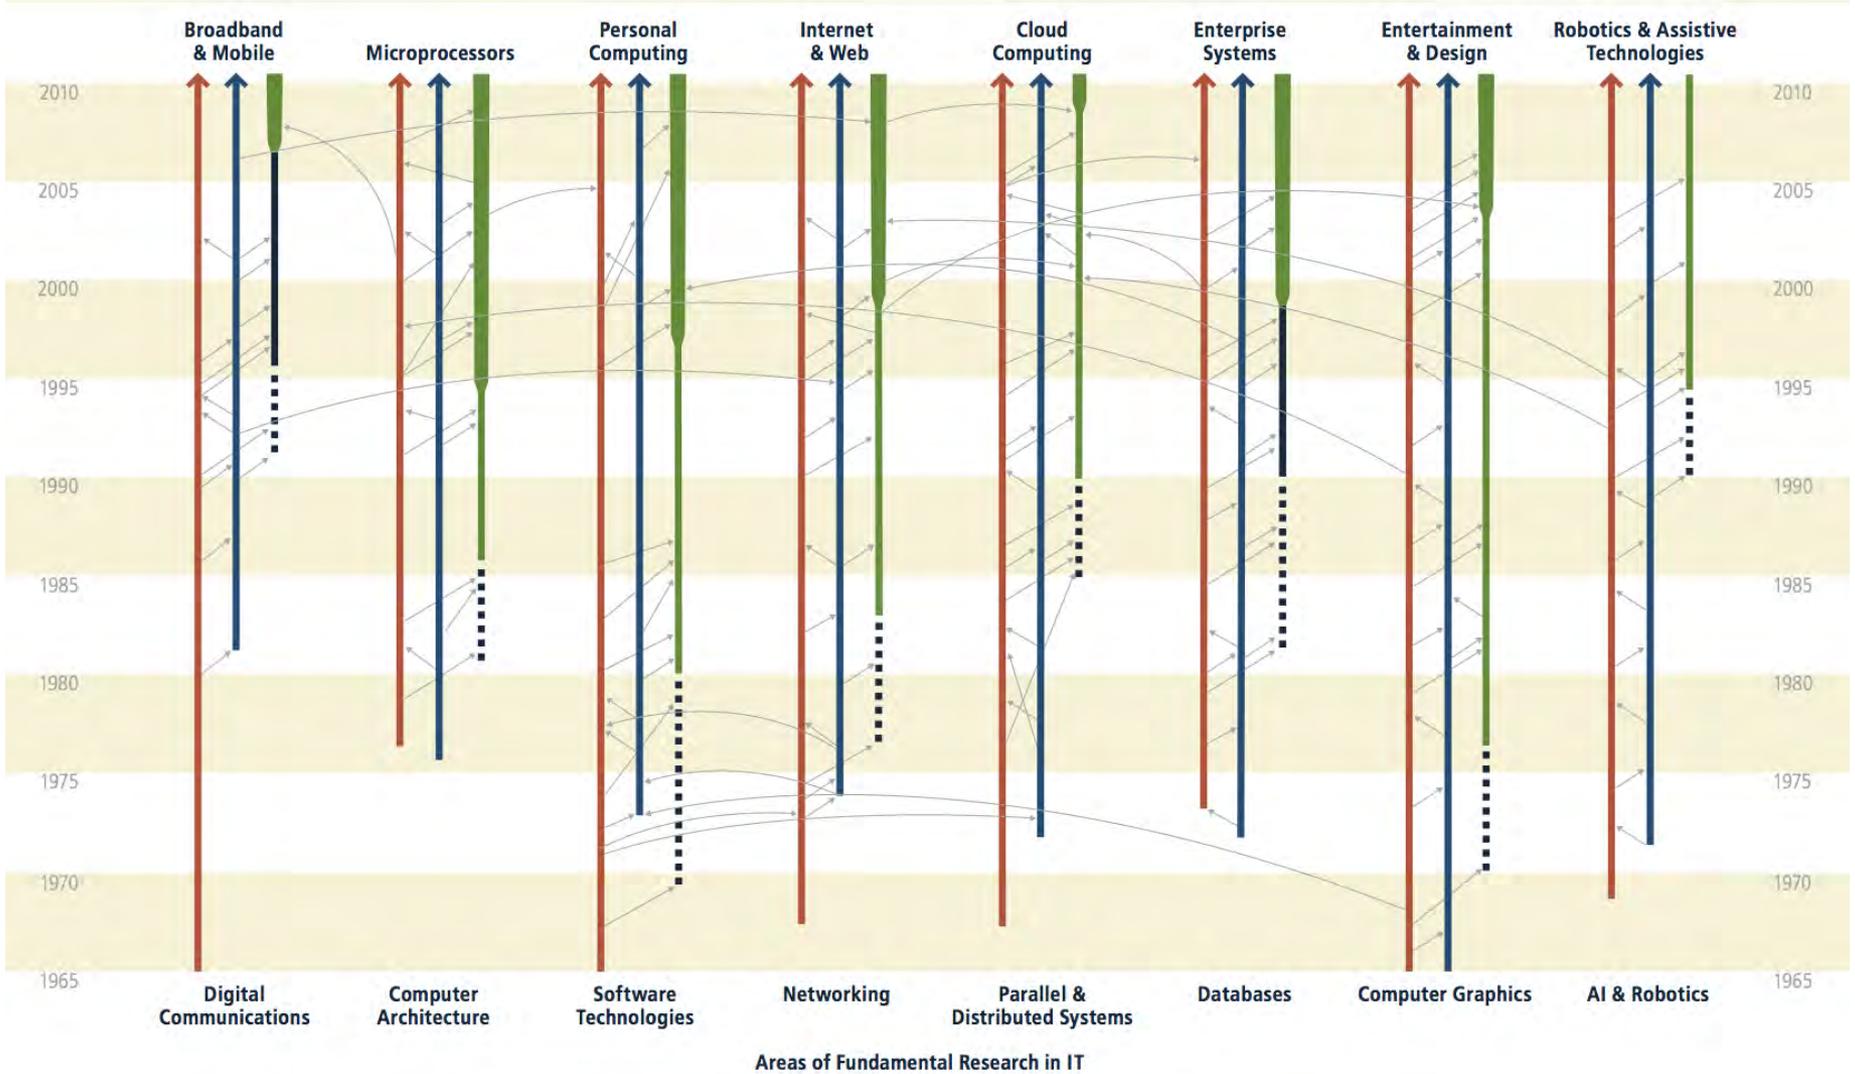

Laura Haas, IBM

Ed Lazowska, UW

Peter Norvig, Google

IT Sectors With Large Economic Impact

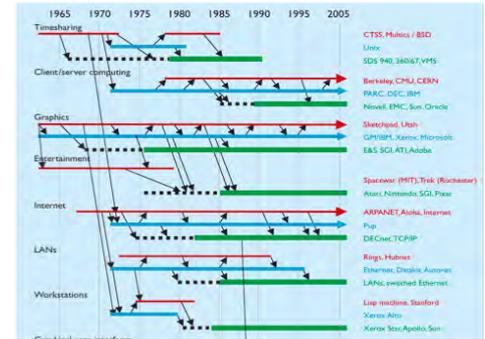

Motorola AMD Intel eBay Akamai Yahoo! IBM Electronic Arts
 Qualcomm HP Symantec Juniper Facebook Twitter VMware HP Adobe Autodesk
 Texas Instruments Apple Cisco Amazon Microsoft Oracle nVidia Pixar Xbox
 iPhone Dell Google Nuance
 iRobot
 Intuitive Surgical

— University
 — Industry R&D
 — Products
 — \$1 Billion Market
 — \$10 Billion Market

CSTB...

- Explains how IT evolves, the role of R&D, and the role of different contributors—public and private—to that process
- Guides the evolution of IT research programs and stimulating work in emerging/key areas
 - Computing performance, software, health IT, biometrics, wireless, embedded sensor networks, ...
- Explicates the workings of the Internet and charting its evolution
- Provides unclassified analysis of offensive side of cybersecurity, fostering public discussion and debate
- Recommends better approaches for IT development in the federal government
 - Medicare, social security, FBI, ...
- Provides an evaluation framework for assessing information-based homeland security programs
- Recommends defense IT acquisition reforms

Panel Warns U.S. on Cyberwar Plans

By JOHN MARKOFF and THOM SHANKER

To do so, GAO developed a systematic evaluation framework based on recommendations and best practices outlined by the National Research Council, industry practices, and prior GAO reports. GAO compared its

IT Sectors With Large Economic Impact

Motorola — AMD Intel — eBay Akamai Yahoo! — IBM — Electronic Arts
 Qualcomm — HP Symantec Juniper Facebook Twitter VMware — HP — Adobe Autodesk
 Texas Instruments — Apple — Cisco — Amazon — Microsoft — Oracle — nVidia Pixar Xbox
 iPhone — Dell — Google — iRobot Intuitive Surgical

Electronic commerce industry

— University — Industry R&D — Products — \$1 Billion Market — \$10 Billion Market

Bottom line: **Leadership in IT** depends
on a **commitment to research**

Focal points for the update

- **Audience:**
 - Policymakers
 - “Yeah, it sure takes a long time to understand and explain that diagram.”
- **Product:**
 - A powerpoint friendly figure + report
 - Stick with what works, but update & streamline
