Seattle installs new system to track individual drivers

by David Kroman

Gray boxes, holding the wiring for nearby traffic signals, dot more than 1,000 intersections throughout Seattle. They fade into the background by design, many of them further camouflaged with graffiti and posters for candidates or concerts.

It would be no surprise, then, if you've missed a new accoutrement added to many of these boxes in the last year: a small rubber antenna, like a lily pad or tiddlywink, perched on...
