Communications Associate

COMPUTING COMMUNITY CONSORTIUM

The **mission** of the Computing Research Association's Computing Community Consortium (CCC) is to **catalyze** the computing research community and **enable** the pursuit of innovative, high-impact research.

Computing Research Community

National Priorities · Agency Requests · Blue Sky Ideas · Open Visioning Calls

→ Council-Led Workshops · Community Visioning

→ Reports • White Papers · Roadmaps • New Leaders

→ Public · Funding Agencies · Science Policy Leadership

Bring the computing research community together to envision audacious research challenges.

Communicate these challenges and opportunities to the broader national community.

Facilitate investment in these research challenges **by key stakeholders**.

Inculcate values of **leadership** and service by the computing research community.

Inform and influence early career researchers to engage in these community-led research challenges.

REQUEST FOR PROPOSALS

A well-formulated proposal should do the following:

- *describe* the visioning topic area and its current state of development within the field
- *explain* the proposed activities in detail
- *connect* the activity and the vision: how does the former support/ foster the latter?
- *justify* why this vision and this activity are appropriate now,
- *specify* the intended outcomes of the workshop, and
- *describe* how those outcomes can be used to advance the visioning topic area.

Each proposal will be reviewed based on its potential to be a compelling vision and to engage a large segment of the research community, policy, and funding agencies.

Proposals may be submitted by email anytime to cccrfp@cra.org as an attachment in PDF, Postscript, or WordA well-formulated proposal should do the following:

COUNCIL NOMINATIONS

The CCC's Nominating Subcommittee invites nominations (including self-nominations) for members to serve on the CCC Council for the next three years, beginning July 1, 2017. Please send nominations, together with the information below, to ccc-nominations@cra.org by 11:59 pm PST on Friday, February 3, 2017. The subcommittee's recommendations will serve as input to CRA and NSF, who will make the final selection.

Please include: Name, affiliation, and email address of the nominee.

- Areas of research expertise.
- Previous significant service to the research community and other relevant experience, with years it occurred (no more than *five* items).
- A brief biography or curriculum vitae of the nominee.
- The names and contact information (email and phone) for 2-3 people who would be knowledgeable about the nominee's potential for such a service role.
- A statement from the nominee of less than one page, supporting his or her nomination by describing his or her ideas for, and commitment to, advancing the work of the CCC in encouraging new research directions, engaging broader communities, and finding wider funding sources.
