CATALYZING IT'S VIRTUOUS CYCLE

COMPUTING RESEARCH

ADDRESSING NATIONAL PRIORITIES AND SOCIETAL NEEDS

Establish a biennial symposium to communicate the role of computing research to address national and societal priorities

- Fall, 2017
 - Intelligent Infrastructure for our Cities and Communities
 - Security and Privacy for Democracy
 - AI and Amplifying Human Abilities
 - Data, Algorithms, and Fairness

CCC

Computing Community Consortium
Catalyst

COMMUNICATING

- Workshop Reports
- White Papers
 - CCC works with community to produce timely white papers that inform policymakers and the broader community on national priorities
- CCC Blog
 - Provides a continuous stream of information on advances in computing research
 - Opportunities for community to get involved
 - Forum for community discussion
- Great Innovative Ideas
 - A way to showcase the exciting new research and ideas generated by the computing community
- Annual Events
 - CCC Symposium
 - CRA Snowbird
 - Leadership in Science Policy Institute (LISPI)
- Special Events
 - Sessions at AAAS Annual Meeting

CCC TASK FORCES

CCC task forces are organized around national priorities, community needs, and council member interests.

Current topics:

- Artificial Intelligence
- Cybersecurity
- Human Technology Frontier
- Intelligent Infrastructure
- Post Moore's Law Computing
- Privacy and Fairness

THE CCC COUNCIL

Terms ending June 2020

- Nadya Bliss, Arizona State
- Elizabeth Churchill, Google
- Juliana Freire, NYU
- Keith Marzullo, Maryland
- Greg Morrisett, Cornell
- Jennifer Rexford, Princeton
- Manuela Veloso, Carnegie Mellon
- Ben Zorn, Microsoft Research

Terms ending June 2019

- Kevin Fu, Univ. Michigan
- Sampath Kannan, UPenn
- Maja Mataric, USC
- Nina Mishra, Amazon
- Holly Rushmeier, Yale

Terms ending June 2018

- Liz Bradley, CU Boulder
- Cynthia Dwork, Microsoft Research
- Daniel P. Lopresti, Lehigh University
- Shwetak Patel, Univ. Washington
- Katherine Yelick, UC Berkeley

THE CCC COUNCIL LEADERSHIP & STAFF

← Executive Committee:

- Beth Mynatt, Georgia Tech, (Chair)
- Mark Hill, U of Wisconsin, Madison (Vice Chair)
- Ben Zorn, Microsoft Research
- Jennifer Rexford, Princeton
- Daniel P. Lopresti, Lehigh
- Ann Drobnis, Director
- Andy Bernat, CRA Executive Director

CCC Staff →

- Helen Wright
- Khari Douglas

CRA Staff →

- Peter Harsha, Dir. of Gov't Affairs
- Sandra Corbett
- Sabrina Jacob

Catalyst

NURTURING NEXT GENERATION OF LEADERS

➔ Inviting Future Leaders to CCC Workshops! ⬅

Industry – Academic Collaborations

- CCC collaborated with Big Data Regional Hubs
- Activities to enhance the research of early career faculty

Leadership in Science Policy Institute

- Educates and trains computing researchers on how science policy in the U.S. is formulated and how to advocate for computing research
- Co-sponsored by CRA's Government Affairs Committee

E.g., Computing Innovation Fellows Project (Symposium 8/2018)

- Rapidly created the CI Fellows program to preserve human capital when faculty positions became scarce with the financial crisis

IMPACT: ARCHITECTURE

Workshop on Advancing Computer Architecture Research (ACAR-I)

Failure is not an Option: Popular Parallel Programming

Organizers: Josep Torrellas (University of Illinois) and Mark Oskin (University of Washington).

Steering Committee: Chita Das (NSF and Pennsylvania State University), William Harrod (DARPA), Mark Hill (University of Wisconsin), James L. Martinosi (Princeton University), Jose M. B. (IBM Research), and Kamle Olukotun (Stanford University).

Written by: Josep Torrellas, Mark Alameddine, Chitchanok, Chita Das, Jon Hiller, Sampath Kannan, Krishnamoorti, Richard Murphy, Onur Mutlu, Suresh Anand Sivashubramanian, Kevin Skadron, Karin Strauss, Steven Swanson, Dean Tullsen.

Funded by the Computing Research Association's (CRA) Computing Consortium (CCC) as a "visioning exercise" meant to prompt forward thinking computing research and then bring these ideas to a funded program.

Held on February 21-23, 2010 in San Diego, California
Contact: torrella@illinois.edu; oskin@cs.washington.edu
Websites: http://www.cra.org/ccc/acar.php; http://iacoma.cs.uiuc.edu/acar-i

Workshop on Advancing Computer Architecture Research (ACAR-II)

Laying a New Foundation for IT: Computer Architecture for 2025 and Beyond

Organizers: Mark Oskin (University of Washington) and Josep Torrellas (University of Illinois).

Steering Committee: Chita Das (Pennsylvania State University), M. (University of Wisconsin), James Larus (Microsoft Research), Margaret Martonosi (Princeton University), Jose Moreira (IBM Research), and Olukotun (Stanford University).

Written by: Mark Oskin, Josep Torrellas, Chita Das, John Davis, Saikrishna, Liwen Eeckhout, Bill Feenstra, Daniel Jimenez, Mark Kim, James Larus, Margaret Martonosi, Onur Mutlu, Kostas Andrew Putnam, Tim Sherwood, James Smith, David Wood, C. (University of Wisconsin).

Funded by the Computing Research Association's (CRA) Computing Consortium (CCC) as a "visioning exercise" meant to prompt forward thinking in computer research architecture.

Held on September 20-21, 2010 in Seattle, Washington
Contact: oskin@cs.washington.edu; torrella@illinois.edu
Website: http://www.cra.org/acar.php

21st Century Computer Architecture

A community white paper
May 25, 2012

1. Introduction and Summary

Information and communication technology (ICT) is transforming our world healthcare, education, science, commerce, government, defense, and entertainment to remember that 20 years ago the first step in information search involved a trip to 10 years ago social networks were mostly physical, and 5 years ago Twitter's cartoon characters.

Importantly, much evidence suggests that ICT innovation is accelerating with many visions moving from science fiction toward reality. Appendix A both touches upon this and seeks to distill their attitudes. Future visionaries include personalized medicine and drugs to an individual, sophisticated social network analysis of potential threats and homeland security, and telepresence to reduce the greenhouse gases spent on future applications will increasingly require processing on large, heterogeneous (e.g., cloud), using distributed devices, working within four-factor associations, and so deployment with efficient operation.

Two key—but often invisible—enablers of technology and computer architecture are Moore's Law and Moore's Law for roughly of Computer architects took these rapid rate techniques to scale processor performance and mitigate memory system losses effect of technology and architecture has provided ICT innovators with exponential growth at near constant cost.

Because most technology and computer architecture innovations were intentionally higher layers, application and other software developers could reap the benefits of it without engaging in it. Higher performance has both made more computationally applications feasible (e.g., virtual assistants, computer vision) and made less applications easier to develop by enabling higher-level programming abstractions (e.g., languages and reusable components). Improvements in computer system cost-of-enabled value creation that could never have been imagined by the field's four distributed web search sufficiently inexpensive so as to be covered by advertising like

Division of Computer and Network Systems

Office of Cyberinfrastructure

Full Proposal Deadlines: (due by 5 p.m. proposer's local time)
February 20, 2013

IMPORTANT INFORMATION AND REVISION NOTES

A revised version of the NSF Program & Award Policies & Procedures Guide (PAPPG), NSF 13-1, was issued on November 15, 2012. This revision includes updates to the PAPPG that affect the XPS program. Please review the changes to the guidelines contained in NSF 13-1 apply to proposals submitted in response to this funding opportunity after the date of publication of the revised PAPPG, which is expected to be published in early 2013.

Please be aware that significant changes have been made to the PAPPG to implement recent moves either based on the National Science Foundation's (NSF) mission or on external factors. These changes are intended to clarify and improve the function of the office. Changes will affect the project summary and project selection sections of proposals. Annual and final reports will also be affected.

A by-chapter summary of all other significant changes is provided at the beginning of both the *Grant Proposal Guide* and the *Award & Administration Guide*.

Please refer to the program solicitation page, current conceptual proposal preparation guidance website guidance that describes how to prepare a grant proposal, and the *Grant Proposal Guide*.

SUMMARY OF PROGRAM REQUIREMENTS

General Information

Program Title:
Exploring Parallelism and Scalability (XPS)

Synopsis of Program:
Computing systems have undergone a fundamental transformation from the single processor device of the late 1940s to today's ubiquitous and reconfigurable devices and warehouse-scale computing via the cloud. Parallelism has become a central theme in the design of new systems. The proliferation of multi-core and many-core processors, ever-increasing numbers of interconnected high-performance and data-intensive edge devices, and the data centers serving them, is enabling a new era of global applications with large economies and social impact. At the same time, the sheer volume of data being generated is forcing a paradigm shift in how we store, process, and analyze data. This means that the ability to achieve predictable performance through traditional architectural approaches is becoming increasingly challenging.

The Exploring Parallelism and Scalability (XPS) program aims to support groundbreaking research leading to a new era of parallel computing. XPS seeks research in evaluating, and possibly redesigning, the traditional computer hardware and software stacks to fully leverage parallel and distributed systems and exploiting new opportunities for parallelism and scalability. Funding for XPS is available to researchers who can demonstrate effort among researchers representing at least two different academic disciplines to collaborate across disciplinary boundaries to address challenges in scaling performance and usability across non-trivial models and algorithms, programming models and languages, hardware architectures, complex operating systems and run-time systems, and social development and adaptation-specific knowledge. Research should focus on issues in energy, communication efficiency and on enabling the design of efficient between-edge devices and clouds.

AN OVERVIEW OF THE COMPUTING COMMUNITY CONSORTIUM

- Established in 2006 as a standing committee of the Computing Research Association (CRA)
- Funded by NSF under a Cooperative Agreement
- Facilitates the development of a bold, multi-themed vision for computing research – and communicates this vision to stakeholders
- Led by a broad-based Council
- Staff based at CRA

CCC

Computing Community Consortium
Catalyst

MAJOR STAKEHOLDERS

- Computing Research Community
 - CRA
 - CSTB (Computer Science and Telecommunications Board, part of National Research Council)
 - Professional societies
 - Academic units
 - Research labs
- Industry
 - Computing industry, Major users of IT
- Public
- Government
 - See following slides

GOVERNMENT STAKEHOLDERS

Agencies important to us:

- NSF
- NIH
- DARPA
- DoE
- NIST
- HHS/ONC

Networking and Information
Technology R&D (NITRD)

- Legislatively mandated coordination among Federal R&D agencies
- National Coordinating Office (NCO) facilitates
 - Interagency working groups
 - Coordinating groups
 - Senior steering groups
 - Community of practice

THE CCC COUNCIL – EXECUTIVE COMMITTEE

Members:

- Beth Mynatt, Georgia Tech (Chair)
- Mark Hill, University of Wisconsin, Madison (Vice Chair)
- Ben Zorn, Microsoft Research
- Jennifer Rexford, Princeton
- Daniel P. Lopresti, Lehigh
- Ann Drobnis, Director
- Andy Bernat, CRA Executive Director

THE CCC COUNCIL

Terms ending June 2020

- Nadya Bliss, Arizona State
- Elizabeth Churchill, Google
- Juliana Freire, NYU
- Keith Marzullo, Maryland
- Greg Morrisett, Cornell
- Jennifer Rexford, Princeton
- Manuela Veloso, Carnegie Mellon

GOALS FOR CCC

1. **Bring the computing research community together to envision audacious research challenges**, and to articulate concrete pathways to enable pursuit of these challenges.
2. **Communicate** these challenges and opportunities to the broader national community.
3. **Facilitate investment** in these research challenges **by key stakeholders**.
4. **Inculcate** values of **leadership** and service by the computing research community.
5. **Inform and influence early career researchers** to engage in these community-led research challenges.

DESIRED OUTCOMES

1. **Create broad awareness of the role computing research will play in future science and technology advances** within federal agencies, philanthropic organizations, and industry through concrete examples and products.
2. **Facilitate broad engagement of the computing research community** in identifying and articulating new directions for computing research, in shaping priorities for those new directions, and in responding to existing opportunities in the computing research ecosystem.
3. **Create high-impact tangible resources** that inform stakeholders as to the current and potential impact of computing research.
4. **Sustain the CCC** as a widely accepted catalyst and voice for the computing research community.
5. **Grow leadership and community capacity** to engage in and respond to national science policy needs.

ACTIVITIES

Envisioning Future Computing Research

- Workshops
- Blue Sky Ideas Conference Tracks
- Computing Research Symposia: Addressing National Priorities and Societal Needs

Engaging and Aligning with National and Computing Research Priorities

- Outputs of Visioning Activities
- Short Reports / White Papers
- Task Forces

Communicating Future Computing Research

- CCC Blog (<http://cccblog.org>)
- Great Innovative Ideas
- Computing Research Symposia
 - Fall 2017

Cultivating Computing Leadership and Community Capacity

- Postdoc Best Practices
- Industry – Academic Collaborations
- Computing Innovation Fellows (CIFellows) Project
- Leadership in Science Policy Institute (LiSPI)

CCC

Computing Community Consortium

VISIONING ACTIVITIES

- Over 45 visioning activities in 11-year history
- Average of 6 activities per year in the last 4 years
- Research areas include:
 - Smart and Pervasive Health
 - Nanotechnology-inspired Information Processing Systems
 - Cyber Social Learning Systems
 - Privacy by Design
 - BRAIN Initiative
 - Inclusive Access
 - Personalized Education
- 13 workshop reports released in past 4 years
- 20 white papers released in past 4 years

Workshop	Date
Quantum Computing	May 22-23, 2018
Digital Computing Beyond Moore's Law	May 3-4, 2018
Robotic Materials	April 23-24, 2018
Sociotechnical Interventions for Health Disparity Reductions	April 9-10, 2018
Fair Representation and Fair Interactive Learning	March 18-19, 2018
Sociotechnical Cybersecurity Workshop 2	August 8-9, 2017
AAAI Symposium on AI for Social Good	March 27-29, 2017
Cyber Security for Manufacturers	March 14-15, 2017
Cyber-Social Learning Systems Workshop 3	January 24-25, 2017
Sociotechnical Cybersecurity Workshop 1	December 12-13, 2016
Discovery and innovation in Smart and Pervasive Health	December 5-6, 2016

BLUE SKY

Goal - Help conferences reach out beyond the usual research papers. Papers are opened ended and possibly “outrageous” or “wacky.”

- 8 different tracks at 6 different conferences in last 4 years
- On average, 13 papers submitted per track at a conference
- Winners are asked to submit Great Innovative Ideas

Past CCC Chair Gregory Hager with AAAI-16
Blue Sky award winner Francesca Rossi

CCC

Computing Community Consortium
Catalyst

CCC TASK FORCES

CCC task forces are organized around national priorities, community needs, and council member interests.

Goal is for CCC to be **engaged in ongoing activities** around these topics, to **identify needs and opportunities** in the topic area, and to **identify actions** (generating white papers, convening a workshop, publicizing information, etc.) that have the possibility of “moving the needle” for these topics.

Annual process to determine topics, membership and priorities. Informed by major stakeholders (NSF, OSTP, PCAST, NITRD, workshops and council members).

Our current set of topics are:

- Artificial Intelligence
- Cybersecurity
- Human Technology Frontier
- Intelligent Infrastructure
- Post Moore’s Law Computing
- Privacy and Fairness

COMPUTING RESEARCH

ADDRESSING NATIONAL PRIORITIES AND SOCIETAL NEEDS

Establish a biennial symposium to communicate the role of computing research to address national and societal priorities

- Spring, 2016
 - Computational Methods for Sustainable Development
 - Computing Enhancing Our Lives
 - Personal Control of Digital Data
 - Partnerships for the Future
- Fall, 2017
 - Intelligent Infrastructure for our Cities and Communities
 - Security and Privacy for Democracy
 - AI and Amplifying Human Abilities
 - Data, Algorithms, and Fairness

CCC

Computing Community Consortium
Catalyst

COMMUNICATING

- Workshop Reports
- White Papers
 - CCC works with community to produce timely white papers that inform policymakers and the broader community on national priorities
- CCC Blog
 - Provides a continuous stream of information on advances in computing research
 - Opportunities for community to get involved
 - Forum for community discussion
- Great Innovative Ideas
 - A way to showcase the exciting new research and ideas generated by the computing community
- Annual events
 - CCC Symposium
 - CRA Snowbird
 - Leadership in Science Policy Institute (LISPI)
- Special Events
 - Sessions at AAAS Annual Meeting

2016

AI for Social Good
2016

NURTURING NEXT GENERATION OF LEADERS

Grow leadership and community capacity to engage in and respond to national science policy needs and identify new directions for computing research.

Leadership in Science Policy Institute

- Educates and trains computing researchers on how science policy in the U.S. is formulated and how to advocate for computing research
- Co-sponsored by CRA's Government Affairs Committee

Industry – Academic Collaborations

- CCC collaborated with Big Data Regional Hubs
- Activities to enhance the research of early career faculty

Postdoc Best Practices

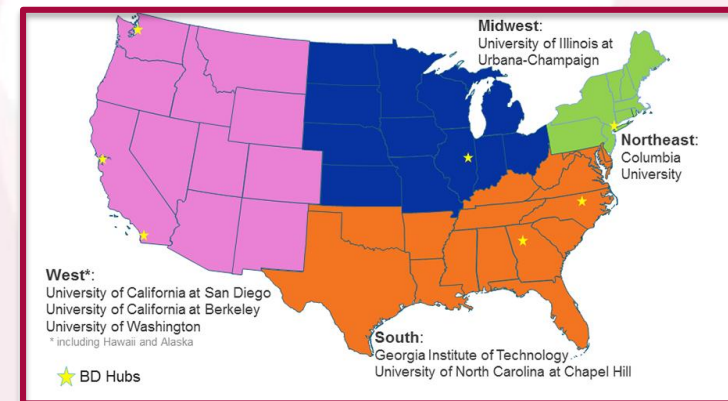

- Program to study institutional support structures for postdocs
- 3 programs: University of Washington, NY ASCENT, Arizona

Computing Innovation Fellows (CIFellows) Project

- Rapidly created the CI Fellows program to preserve human capital when faculty positions became scarce with the financial crisis

ENGAGING WITH INDUSTRY

- Working with industry leaders in planning CCC workshops
- Hosting CCC activities at industry events
- Cultivating and working with federal-industry partnerships
- Engaging non profits and industry consortia
- Taking a broad view on computing industry
- Ensuring industry participation at CCC events

AMPLIFICATION

BRAIN Initiative
launched in 2013.

CCC co-hosted the
