

Educational Simulations and Blended Learning for Workforce Training in Photonics

Dr. Erik Verlage – everlage@mit.edu
Postdoctoral Associate - MIT
AIM Photonics Academy

Dr. Sajan Saini – sajan@mit.edu
Education Director
AIM Photonics Academy

Prof. Lionel C. Kimerling – lkim@mit.edu
Dept. Materials Science and Engineering
MIT

American Institute for Manufacturing (AIM) Photonics

Technology Development

- Applications in data centers, sensing, autonomous vehicles, and more

People Development

- Education and workforce development at MIT

This is AIM Academy

- **Photonics** is the science and practice of manipulating photons, the smallest unit of light.
- **Integrated photonics** uses *thousands* of photonic components on a single chip. This dramatically reduces **size**, **weight**, and **power consumption**.

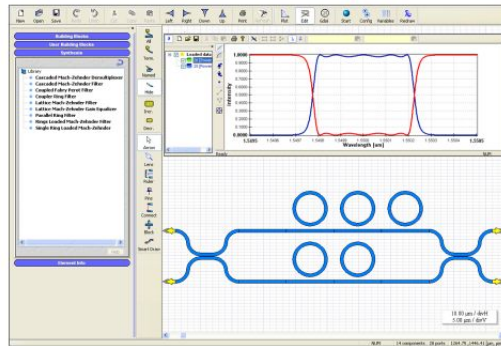

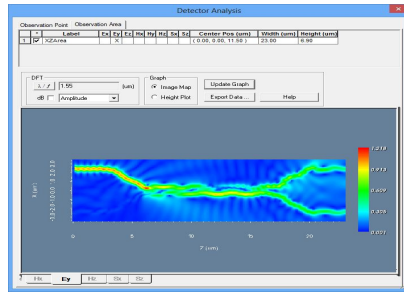

Electronics on a chip

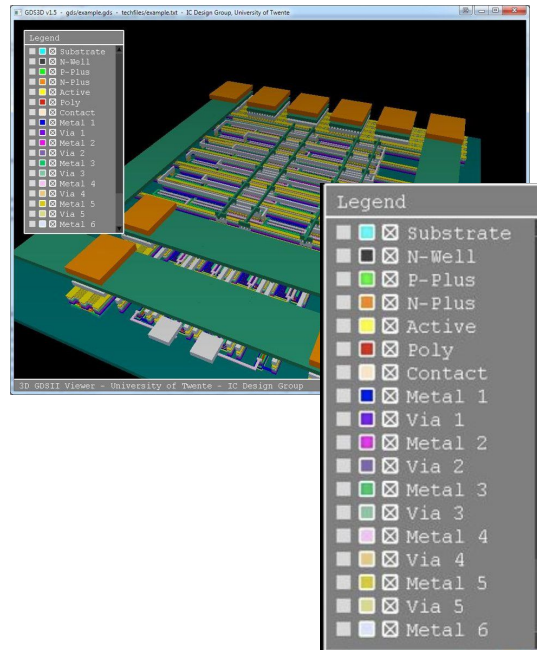

Photonics on a chip

Step 1: Electronic / photonic simulation

Step 2: Layout file (GDSII)

Step 3: Fabrication

AIM Academy Product Portfolio

Education

Summer Academy | **Online Education** | **Virtual Lab** | TED-Ed

Workforce Development

LEAPs | Future Leaders | Certification

Roadmap

Technical Meetings | Application Interest Groups | Webinars

MITx: 3.46.2x

Photonic Integrated Circuits 1 (PIC 1)

Video Lectures

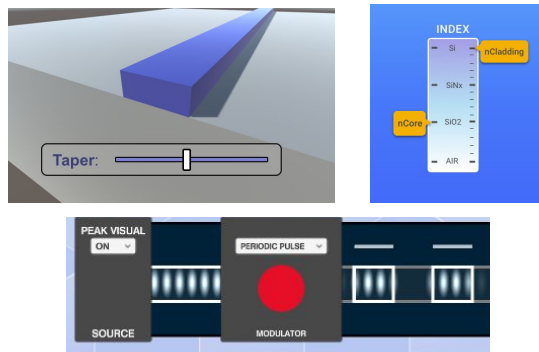

Virtual Lab Simulations

Three MITx courses in 2019-2020:

- Fundamentals of Integrated Photonics
- Photonic Integrated Circuits I
- Photonic Integrated Circuits II

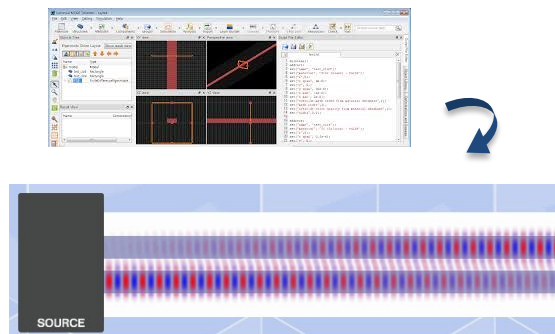

1. Game-Based Learning

- Engaging game mechanics
- Unity game engine
- Embedded learning objectives

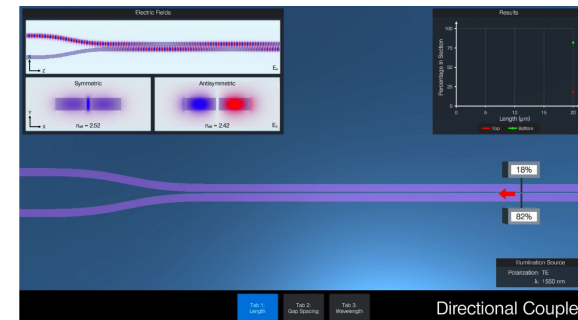

2. Animated Data

- Photonic simulation database
- Low-latency online interface

3. Simulation Modules

- Sequential & level-based pedagogy
- Web-based application

Virtual Manufacturing Lab

Online Courses

Three MITx courses in 2019-2020:

- Fund. Integrated Photonics
- Photonic Integrated Circuits I
- Photonic Integrated Circuits II

Educational Simulation Library

Integrated Photonics Design Engineers

Blended Learning Bootcamps

The Workforce Education Project

The Changing Workplace, Worker Displacement and a New System for Workforce Education

“...upskilling the disrupted manufacturing workforce to meet the upcoming demands of advanced manufacturing.”

“...new ‘blended learning’ (online and face-to-face) content delivery systems for workforce education...”

“...create a true ‘factory of the future’ and dramatically change the workplace.”

Sanjay Sarma

Bill Bonvillian

Additional Slides

Four major areas of interest:

- telecom/datacom
- RF analog applications
- chemical sensors
- LIDAR imaging

Application areas include

- **Data Centers:** high speed optical communication directly on chip surface
- **Advanced Military Equipment and Drones:** precision using integrated photonic circuits
- **Food Safety and Medical Sensors:** pathogen detection and biological sensing
- **Autonomous Vehicles:** navigation driven by photonics-based LIDAR
- *Think also about robotics, curved displays, augmented reality, communications...*

Datacom

RF

Sensin

LIDAR
