Water stress is increasing

Oct. 2014
U.S. Drought Monitor
California

<http://droughtmonitor.unl.edu/>

Sept. 2016

(a) Rainfed crop yield loss

Region	Fruit% loss	# fruit farms
I	13%	2
II	20%	5
III	75%	4
IV	79%	5
V	30%	4
VI	33%	43
VII	69%	14
VIII	60%	2
Mean% loss	47%	
Total # farms		79

(b) Irrigated crop yield loss

Region	Fruit% loss
I	0%
II	4%
III	14%
IV	13%
V	4%
VI	14%
VII	15%
VIII	25%
Mean% loss	11%
Total # farms	

(Sweet et al., Ag Forest Meteor, 2017)

Water stress is *not* controlled

40% of all food crops are irrigated

irrigation accounts for 70% of human use of fresh water.

typical irrigation provides 200% of water needed by crop

(Fereres and Soriano, 2007; United Nations, 2012)

1 almond

1.1 gallon water

(Mother Jones)
