What does CRA-W do?

Individual & Group Research Mentoring

Undergrads: Undergraduate Research Experiences

Undergrads: Distinguished Lecture series/role models

Grad Cohort: Group mentoring of graduate students

Grad Students: Discipline Specific Research workshops

Academics/PhD Researchers: Group mentoring for early and mid career @ CMW, Grace Hopper, and Tapia

600+ students & PhDs a year

CRA-W

Computing Research Association
Women

Laura Dillon, Professor, Comp. Sci & Engr, Michigan State University

Research: formal methods in SE; specification, testing and analysis of concurrent software systems.

Teaching: intro to programming; formal methods.

Major Interest: mentoring and outreach to women in CS

MSUWIC, MICWIC, AiC, TechKobwa, GHCs, Tech Workshops for Girls, ...

My Journey:

1974 BS Math, 1976 MS Math, Univ. Michigan (via Kalamazoo College)

-- 1st marriage; PhD exams (math); year “off”; instructor E. Montana College

1981 MS CS, 1984 PhD CS, 1984 Visit. Assist. Prof, Univ. Mass, Amherst

-- Re-married; birth of 1st child (year 3); birth of 2nd child (3 days after last interview)

1985 Assist. Prof., 1991 Assoc. Prof., 1997 Full Prof., UC, Santa Barbara

-- First 3 NSF grants; Best paper award; ISSTA general chair;

5-year search for 2 tenure-track positions (Infamous 2-Body Problem)

1997 Assoc. Prof., 1998 Full Prof., 2003-7 CSE Dept. Chair, Mich. State Univ.

-- 4 BODY PROBLEM SOLVED! Spouse: Asst. Prof, Fisheries &

Wildlife, MSU; Son: Okemos HS; Daughter: Kinawa MS ==>

Spouse: Full Prof at MSU; Son: BS MSU, Game Designer, NYC;

Daughter: BA, Oberlin College, Performance Artist in LA

CRA-W

Women

Katie A. Siek, Associate Professor, Informatics, Indiana University, Bloomington

Research: health informatics, human computer interaction (HCI), pervasive computing.

Teaching: large project based classes; HCI; Pervasive Computing, Health Informatics

Major Interest: diversifying computing; bringing together computing and health communities; 1st generation college students; low SES communities

Katie A. Siek, Associate Professor, Informatics, Indiana University, Bloomington

Research: health informatics, human computer interaction (HCI), pervasive computing.

Teaching: large project based classes; HCI; Pervasive Computing, Health Informatics

Major Interest: diversifying computing; bringing together computing and health communities; 1st generation college students; low SES communities

My Journey:

2000 BS Computer Science, Eckerd College (Small Liberal Arts)

- National Physical Science Consortium Fellowship (Sandia National Lab)

2000-2002 University of Notre Dame

- TA Award; Advisor did not get tenure

2000, 2001, 2002 Summer Intern Sandia National Lab

- Mentor helped me get acceptances from multiple graduate programs in June!

2002-2006 Indiana University

- MS 2004 – GHC Best Poster New Investigator; Married 2005; PhD 2006

2006-2013 Assistant Professor, University of Colorado Boulder, Computer Science

- Job Search 2006-2007 for two *tenure track positions*; 1st pregnancy (interviewed pregnant)
- Heavily recruited 2009-2013 (2009 NSF CAREER Award; 2010 SICSA Fellow; 2012 Borg ECA); Interviewed with nursing infant

2013 – Present Associate Professor, Indiana University, Informatics (2015 SICSA Fellow)

- 2014 – Present - Undergraduate Chair for Informatics
- 2015 – Present - Associate Professor, DePauw University (liberal arts)

Graduate Student Stipends

- Almost all PhD students and many MS students in CS receive free tuition and a stipend.
- Research Assistant – typically on project related to your PhD or MS thesis
- Teaching Assistant – grading, holding office hours, running problem sessions, possibly teaching a class
- Fellowships are also available
- Travel stipends support trips to conferences

Check
funding
model

How to Start?

- Talk with faculty
- Go to the University Booths too!
 - Ask about research opportunities and internal graduate fellowships
- Get involved in research experiences
 - CRA-W, NSF
- Look for external fellowships
 - Standard – NSF, DoD, DoE
 - NPSC, GEMS

10-Week Research Experience for Undergraduates

- GRE Preparation (optional)
- Dates: Friday, May 19 2017 – Friday, July 28, 2017
- Students receive:
 - \$5000 Stipend
 - Free room and board

How to Apply:

- Fill out online application
- Email ksiek@indiana.edu
 - Unofficial transcripts
 - 2 letter writers
 - (optional) a link to online website/portfolio

About ACRES

iCER ACRES is a 10-week summer Research Experience for Undergraduates (REU) in computational and data science. This REU is coordinated by Michigan State University's Department of Computational Mathematics, Science and Engineering (CMSE), in partnership with the Institute for Cyber-Enabled Research (iCER).

Research projects provided through iCER ACRES focus on the development and enhancement of algorithms, models, and software for applications in multiple research areas that require high-performance computing resources. Research areas include: computational chemistry, biology, astrophysics, mathematics, big data science, and computational electromagnetics.

The program is sponsored by the National Science Foundation (NSF) with funding from the U.S. Department of Defense (DoD) ASSURE program. The REU site directors are Professors Kenneth M. Merz, Jr. and Brian W. O'Shea.

Important Dates

- REU Dates: May 21-July 28, 2017
- Application opens October 1, 2016
- Application closes February 28, 2017

Distributed Research Experiences for Undergraduates (DREU)

SIGN UP FOR DREU UPDATES!

Overview

- ✓ Eligibility
- 📅 Application
- 🔍 Evaluation Criteria
- ? FAQs
- ➔ Compare to CREU
- ☰ Program Procedures & Requirements

Are you an undergraduate student from an underrepresented group interested in exploring research in computer science?

Or are you a faculty member interested in being a research mentor?

Distributed Research Experiences for Undergraduates (DREU) might be the program for you!

DREU is a highly selective program that matches students with a faculty mentor for a summer research experience at the faculty mentor's home institution.

The objective of the DREU program is to increase

Summer Research

Opportunities in Computing

IU-SROC (Summer Research Opportunities in Computing) is a ten-week summer research program in the School of Informatics and Computing designed to attract high potential minority and majority students into graduate school in the fields of computer science, bioinformatics, human centered computing, computer vision, health informatics, security, cloud computing, performance computing. Available projects will be listed

Summer Research

engineering

summer undergraduate research experience

The EnSURE program has filled for 2016. Students who are interested in being notified when applications are available for the 2017 EnSURE program may [CLICK HERE](#).

The EnSURE (Engineering Summer Undergraduate Research Experience) program at Michigan State University offers summer research opportunities for high achieving undergraduates who are studying at institutions in the United States or Puerto Rico. (Students from international institutions may wish to apply for the [inGEAR program](#).)

During Summer 2016, the EnSURE program will take place on the MSU campus from **May 23 through July 29, 2016**.

EnSURE is an "internship in graduate school" and provides participants with an early opportunity to become involved in research by working with faculty mentors in one of eight Engineering departments:

- Biomedical Engineering
- Biosystems & Agricultural Engineering
- Chemical Engineering & Materials Science
- Civil & Environmental Engineering
- Computational Mathematics, Science & Engineering
- Computer Science & Engineering
- Electrical & Computer Engineering
- Mechanical Engineering

Curious about what the undergraduate research experience is all about? Check out [this video](#), featuring an EnSURE program alumna and other undergraduates from MSU.

Expectations and Eligibility

As part of EnSURE, students work full-time on a substantive, faculty-guided research project and participate in professional development activities, including attending weekly seminars and completing periodic writing assignments. Due to the intensive nature of this program, it is expected that students will not enroll in summer coursework or accept other employment during the work week. At the discretion of the faculty mentor, it may be possible for students to enroll in limited (4 credits or less) online coursework or independent study; the student is responsible for any enrollment fees.

Applicants must meet all of the following criteria:

- current undergraduate student, studying at an institution in the United States or Puerto Rico, from any institution or major
- eligible for employment in the USA

Universities
may also
have
