

Carole-Jean Wu
CRA-W Grad Cohort, Class of 2007

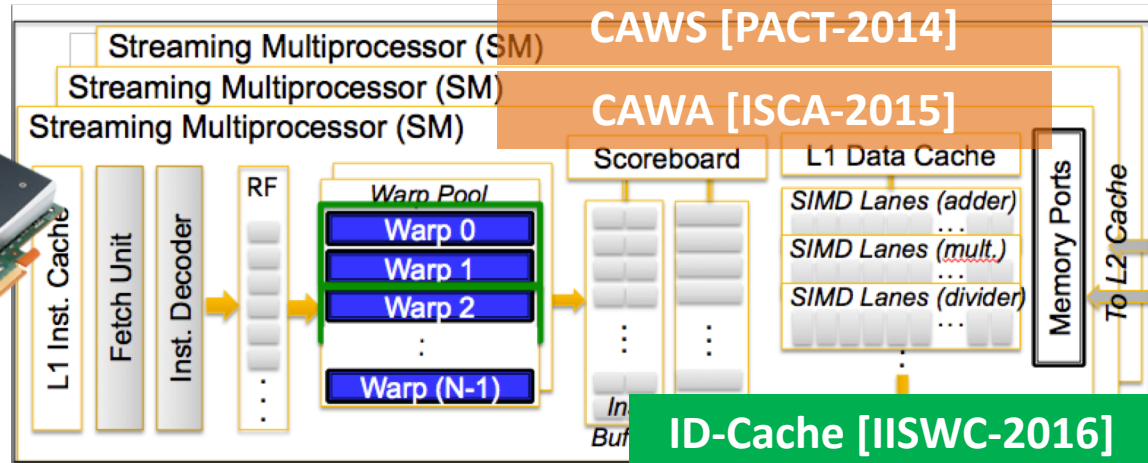

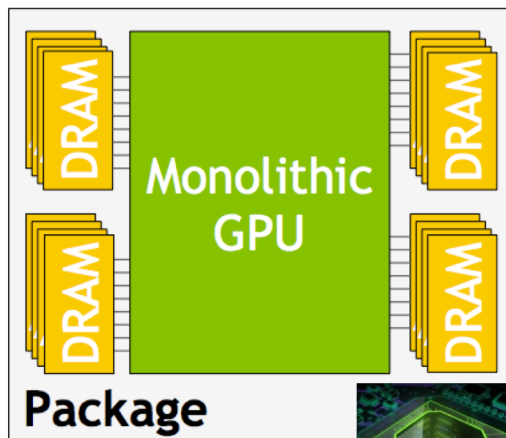

Carole-Jean Wu

Designing System and Processor Architecture for High Performance and Energy Efficiency

- Assistant Professor, ASU
- PhD, Princeton University
- BS, Cornell University
- Research topics
 - Heterogeneity for performance acceleration and energy efficiency optimization
 - Energy harvesting for emerging computing platforms
 - Advanced processor and system cooling designs and energy management

High performance and energy efficient acceleration with GPUs

Latency Characterization [ISPASS-2014]

CAWS [PACT-2014]

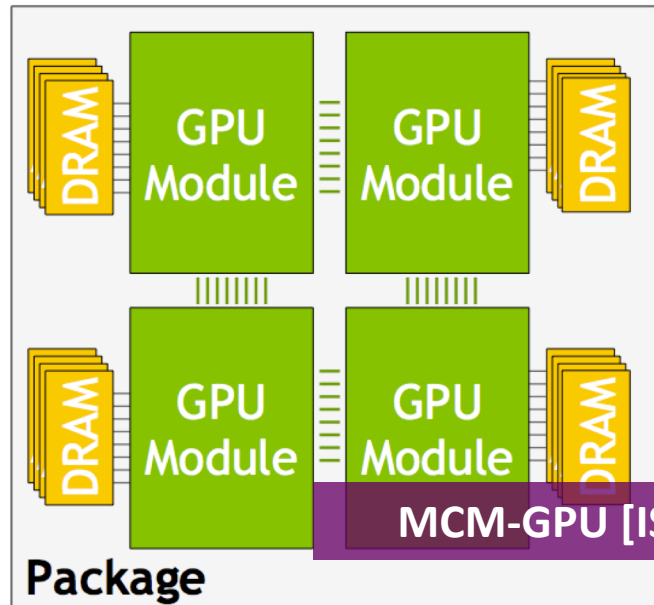

CAWA [ISCA-2015]

ID-Cache [IISWC-2016]

Ctrl-C [ICCD-2016]

heteroPDP [IISWC-2017]

LATTE-CC [HPCA-2018]

MCM-GPU [ISCA-2017]

E-ECC [MEMSYS-2015; TC-2016]

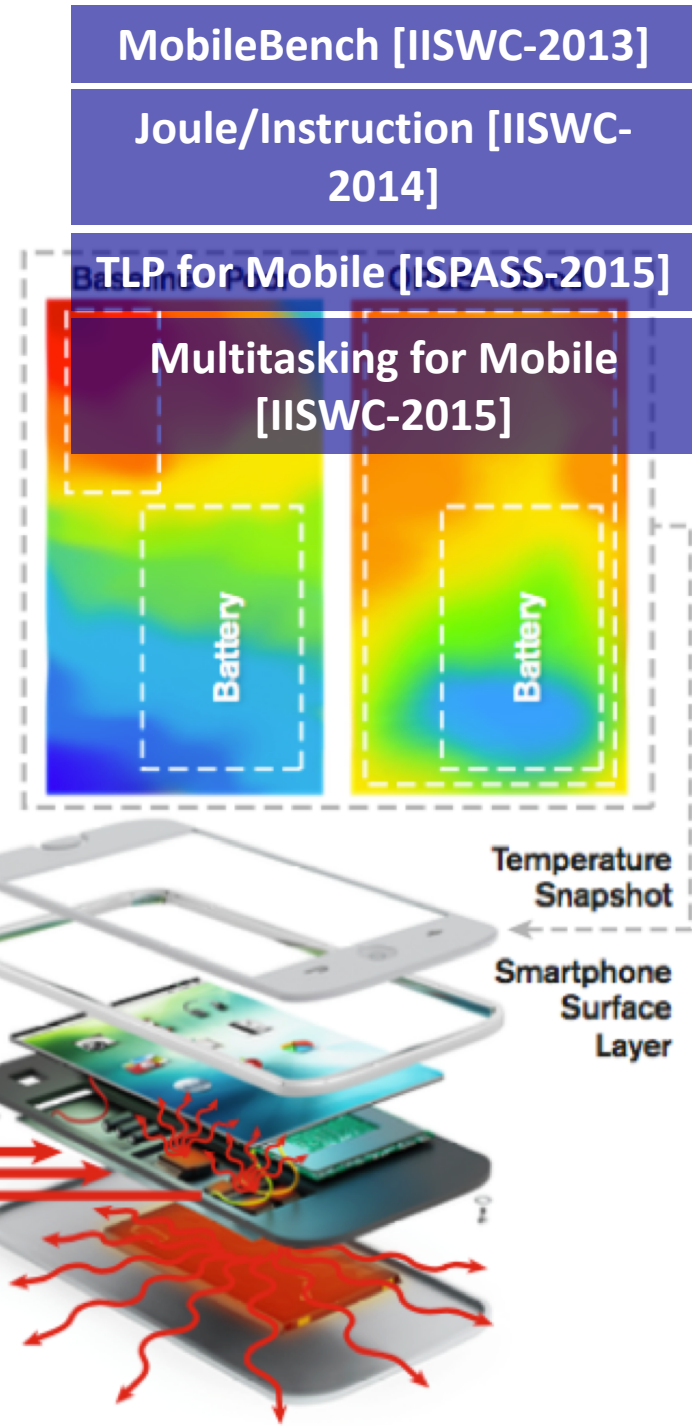

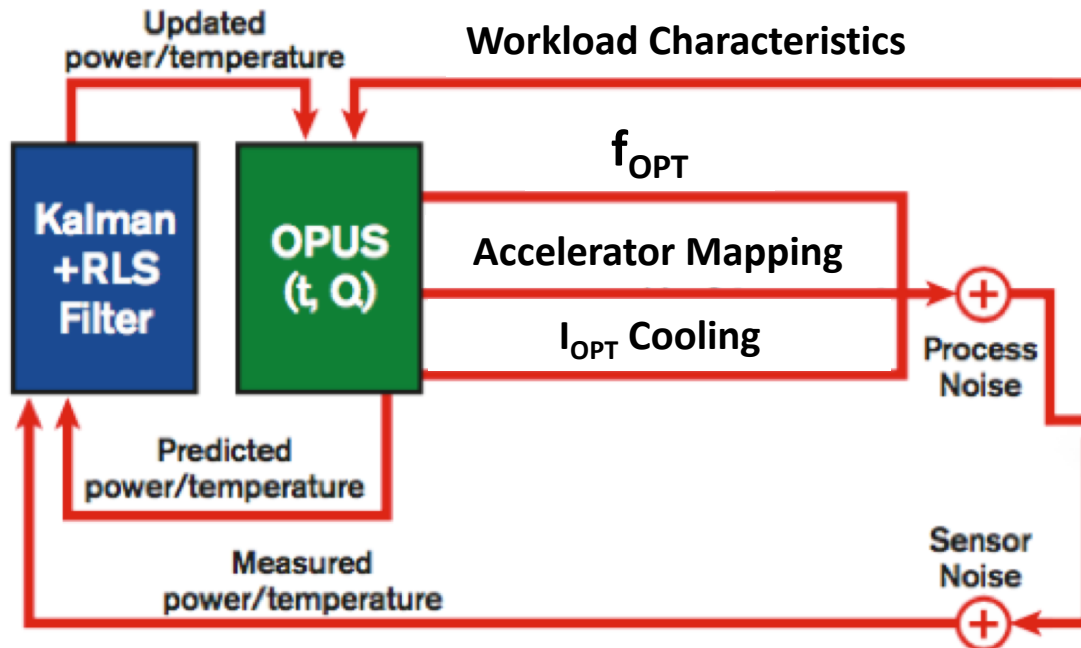

RATT-ECC [TACO-2016]

Multi-Granularity ECC

Performance, temperature, energy management for *portable electronics*

Feedback Control Loop

CRA-W Grad Cohort 2007, 2008, 2009

Grad Cohort 2007

Grad Cohort 2009

Grad Cohort 2008

PhD, 2012

Carole – Lessons from Grad Cohort

- Be ready and be open-minded for exciting opportunities
- Identify important problems and explore less well studied research paths
- Do excellent research & present your work – exciting opportunities will follow
- Cultivate relationships – mentors, supports, advocates, sponsors
- Prioritize and take time to recharge yourself!
