POSTER GUIDELINES

• Make fonts large enough to be read from about 10 feet away
• Use no more than about 3 -4 different colors
• Make your points succinctly, using short bulleted statements, not long textual descriptions
• Poster should be easy to understand even when you are not standing by it to explain
• The following template is a suggestion, that can be modified to fit the story you want to tell
Title
Authors
Institutions

Abstract/Summary
Short description of problem, approach, and major results

Problem
- Why is this an important problem to solve?
- What has been done in the past?
- What is difficult or interesting about this problem?

Approach/
Experimental Design
- When possible, use figures, graphs and pictures to illustrate the problem, approach, and results

Results
- Major findings

Conclusions/Future Directions
- What are the implications from your results to date?
- Based on those implications, what are your future plans?
